POWERFUL ELECTION MANAGEMENT PLATFORM
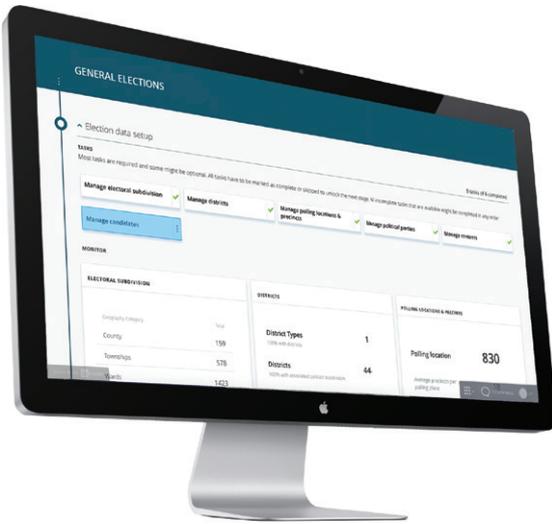

EMP

Centralized Election Management for Successful Elections

Understanding the complexity of elections, Smartmatic supports election commissions with an intelligent web-based platform, making the task of managing elections easier, and more efficient.

The EMP consists of nine main modules:

EMP

Election Management Platform

Identity Management	Election Configuration	Candidate Management	SmartTally	Election-360	Results Management	Election Night Reporting	Online Ballot Delivery	Smartmatic eTrainer
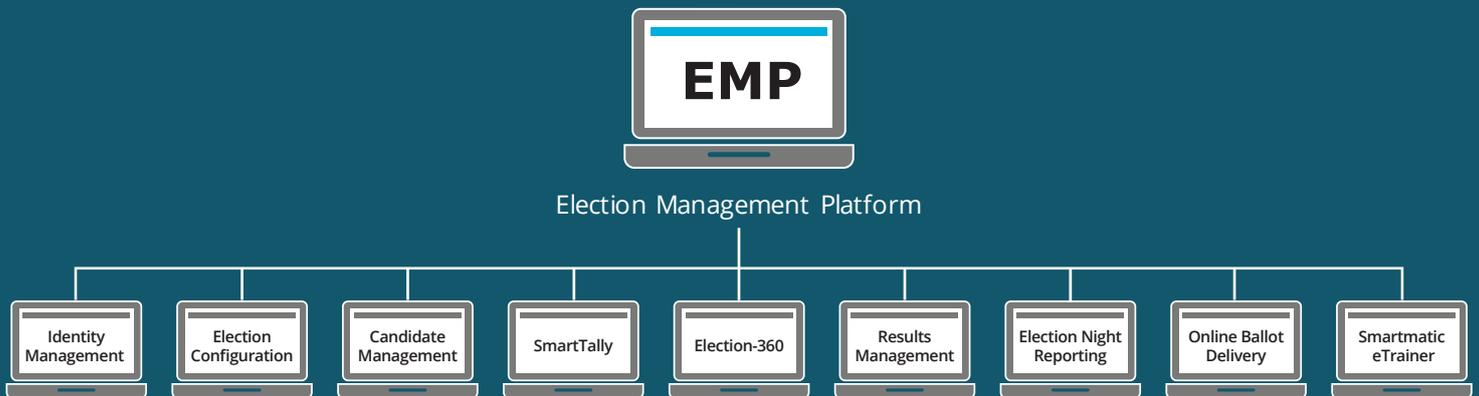

Significant Time Savings

Smartmatic's EMP allows election officials to efficiently create elections, manage important preparation milestones, manage data and leverage the tools needed to prepare and conduct a successful election, in one centralized platform.

The information import capability provides significant time savings, and real time multi-user access maximizes productivity, while ensuring adherence to the schedule.

Improved Decision Making

As the platform collects information, users are facilitated in making informed decisions about what to do next, based on the most accurate information available.

The digital assistant provides context based help, allowing the user to solve issues better and faster.

Highly Usable

The EMP is user-centered designed and leverages the latest concepts in web based application design (WCAG). **The intuitive, workflow-oriented interface with embedded instructions guides the election official through the processes, minimizing errors, and the need for training.**

Completely Secure & Auditable

The system is secured using the latest encryption standards, and a full audit logging capability ensures that every change made in the system is tracked. The logs allow for end-to-end auditing, guaranteeing transparency.

Key Features of the EMP

Identity Management

This module orchestrates the entire central database depuration process supporting registration and authentication projects.

Election Configuration

As the core of the EMP, the Election Configuration assists EMB's with properly designing, planning and managing those millions of details involved in an election.

Candidate Management

EMB's benefit from our Candidate Management as it simplifies the tasks of registering and managing all the information concerning political parties and candidate postulations.

Smartmatic eTrainer

Smartmatic eTrainer is a cloud-based interactive learning management system and communication platform specifically designed to train poll workers.

ELECTION MANAGEMENT PLATFORM

Sitemap   Privacy Policy
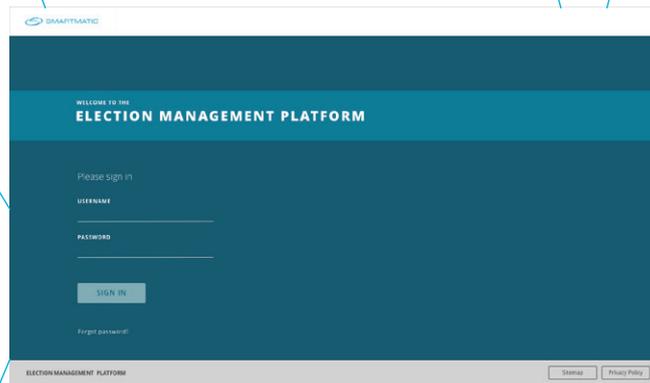

SmartTally

SmartTally securely and accurately collects, transmits, and consolidates results in manual elections.

Online Ballot Delivery

With the Online Ballot Delivery module, eligible voters can pre-mark their ballot online from the convenience of their own home or anywhere else.

Election Night Reporting

Smartmatic's Election Night Report system is highly visual, presents the results in the most appealing way, and the system provides not just data, but useful information.

Results Management

With Results Management, we close the gap between the reception of the results, the monitoring of the process, and tabulation of the results. Process quality and speed are guaranteed.

Election-360

Election-360 enables the effective planning, tracking, communication and control of every process of an election in real time, providing EMB's with full visibility and operational control.

Our clients benefit from our complete portfolio of solutions to make election administration more efficient and transparent. We lead the electronic voting industry with our solutions, geographical presence and technological advancements.
