SMARTMATIC
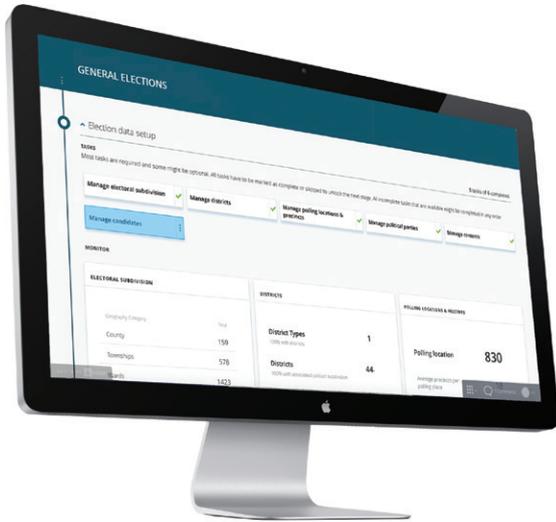

POWERFUL ELECTION MANAGEMENT PLATFORM

EMP

Centralized election management for successful elections

Understanding the complexity of elections, Smartmatic supports jurisdictions with an **intelligent web-based platform**, making the task of managing elections easier, and more accurate.

EMP

Election Management Platform

| Election Configuration | Results Management | Election Night Reporting | Election-360 | Online Ballot Delivery |

Significant Time Savings

Smartmatic's EMP (Election Management Platform) allows election officials to efficiently create elections, manage important preparation milestones, manage data and leverage the tools needed to prepare and conduct an election, in one centralized platform.

The information import capability provides significant time savings, and real time multi-user access maximizes productivity, and ensures adherence to the schedule.

Improved Decision Making

As the platform collects information, users are facilitated in making informed decisions about what to do next, based on the most accurate information available.

The digital assistant provides context based help, allowing the user to solve issues better and faster.

Highly Usable

The EMP is user-centered designed and leverages the latest concepts in web based application design (WCAG). **The intuitive, workflow-oriented interface with embedded instructions guides the election official through the processes, minimizing errors, and the need for training.**

Completely Secure & Auditable

The system is secured using the latest encryption standards, and a full audit logging capability ensures every change made in the system is tracked. The logs allow for end-to-end auditing, guaranteeing transparency.
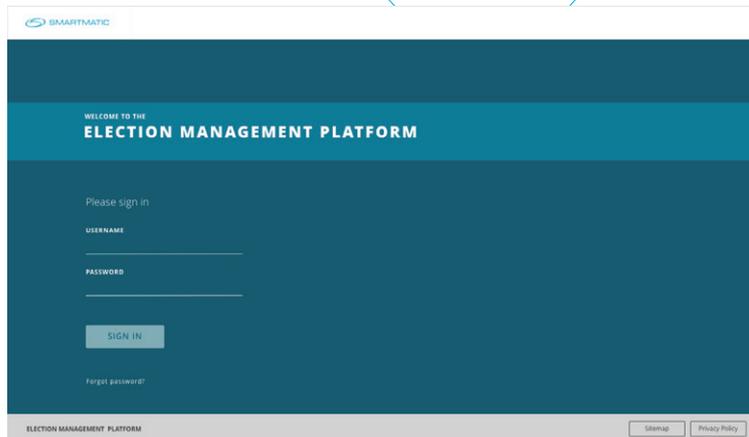

Key Features of the EMP

Election Configuration

As the core of the EMP, the Election Configuration module assists officials with properly designing, planning and managing those millions of details involved in an election.

Results Management

The accurate RM module closes the gap between the reception of results, the monitoring of the process, and tabulation, to deliver rapid results.

Election Night Reporting

The ENR module securely handles the aggregated results and publishes information in the visually most appealing way.

Election-360

Operations are managed effectively with E-360.
Benefit from full visibility, immediate incident control, and real-time field communication.

Online Ballot Delivery

OBD is a fully accessible web-based platform that allows voters to pre-mark a ballot anywhere, via any web-enabled device.

Our clients benefit from our complete portfolio of solutions to make election administration more efficient and transparent.
We lead the electronic voting industry with our solutions, geographical presence and technological advancements.
