

ALL-INCLUSIVE TOUCHSCREEN VOTING SOLUTION

Premium Voting Machine

Enriching the Election Experience

User-centered designed, the Premium Voting Machine includes the highest levels of usability, accessibility and security, guaranteeing independent voting for all voters.

This machine can feature as a:

- Direct-recording electronic (DRE) voting machine; with VVPAT;
- Electronic ballot marking device (BMD) with optional tabulation.

The Premium Voting Machine comes as a tabletop model, or fully embedded into its own case, which can also function as a voting booth.

Highly Usable

Intuitive interface
Embedded instructions
Fully accessible

Optimized for All

Simplified voting process
Convenience
Deployment efficiency

Highest Levels of Security

Vote integrity guaranteed
Tamper evident seals & sensors
Extensive audit mechanisms

Highly Usable

The embedded software instructions, the clean hardware interface, visual voting cues, and contextual help provide everyone with a highly usable voting experience.

Voters with disabilities benefit from the accessibility platform and can vote, verify and cast their vote autonomously.

The Premium Voting Machine provides a VVPAT behind the glass of the Cut&Drop printer allowing any voter to verify their vote independently. This printer can be embedded, or added separately.

Optimized for All

With Smartmatic's Premium Voting Machine, voting processes are simplified, even when the ballot is complex, allowing voters a convenient voting experience.

Poll workers' responsibilities are eased by the machine's set up simplicity and guided instructions, minimizing the need for training.

Highest Levels of Security

The Premium Voting Machine has been reviewed by independent security specialists. Integrity of the vote is guaranteed by the combination of:

- multiple layers of security controls;
- tamper evident seals and sensors;
- the option of a VVPAT;
- and a unique end-to-end auditability layer.

Customizable

Every jurisdiction has unique needs, therefore supported messages and languages, behavior parameters and validations, ballot handling, and voting experience timeouts are completely customizable.

The machine can also include a bar code reader to scan the QR code of a pre-marked ballot for faster voting processes at polling places.

Key Features of the Premium Voting Machine

Our clients benefit from our complete portfolio of solutions to make election administration more efficient and transparent. We lead the electronic voting industry with our solutions, geographical presence and technological advancements.
