

Election Management System

Centralized Election Management for Efficient Elections

Smartmatic is modernizing the election experience with one of the first voting systems in the US built to the VVSG 2.0 standards. Smartmatic's solution is composed of a precinct scanner, a central scanner, a ballot marking device and our election management system software.

Smartmatic supports election commissions with an intuitive and intelligent web-based Election Management System (EMS), making the task of managing elections easier and more efficient.

Compliant with VVSG 2.0

Our forward-looking voting system will be one of the first to be VVSG 2.0 certified. It is designed to protect voting integrity and to modernize your election processes and voter experiences.

Users First

20-plus years of global experience has gone into our EMS. It's user-centered design makes it easier for election officials to do their jobs.

A Seamless Experience

WCAG-compliant, the system boasts an intuitive workflow-oriented interface, embedded instructions and information import capability to minimize errors and the need for training.

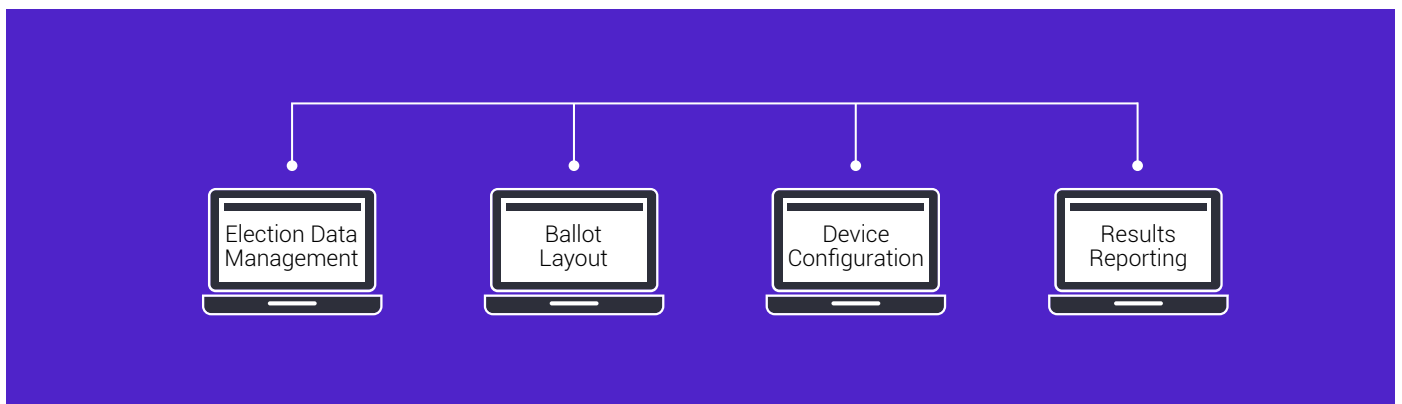

Efficiently Manage Successful Elections with our Powerful EMS

Our EMS simplifies complex, multifaceted processes and allows election officials to:

- Define and configure election events, such as mock elections, early voting and official elections;
- Efficiently manage election data, such as contests, candidates and polling places;
- Easily design and print ballots;
- Create and manage election preparation milestones;
- Configure election devices, such as voting machines, ballot marking devices, optical scanners, voter verification devices, e-poll books and poll worker support devices;
- Monitor the status of operations such as logistics, warehousing, help desk and polling stations;
- Aggregate, consolidate and publish results.

Election Management System

Smartmatic is the world leader in applied cybersecurity and secure election technology—from voter registration, to vote tabulation, to results reporting and auditing. Since its incorporation in the US in 2000, Smartmatic auditable and cybersecure solutions have processed billions of votes in elections on five continents—all with zero security breaches.
