

# VIU Tablet

## Efficient Biometric Voter Registration & Verification

One of the most important ways to guarantee the integrity of an election is to authenticate voters and ensure the 'one voter – one vote' principle.

Smartmatic offers several biographic and biometric solutions that assist operators with voter registration campaigns and voter authentication, one of which is the VIU Tablet.

**The VIU tablet is a powerful biometric device that includes fingerprint, facial and iris recognition capabilities, as well as comprehensive data capture options for MRZ, barcode and signatures.**

### Multifunctional

The same device and database can be used for voter registration and as an e-poll book solution for voter verification during Election Day.

### Intuitive interfaces

Smartmatic's user-centric interfaces guarantee convenient user processes that are intuitive and engaging, and require little or no training at all.

### Usable in any environment

Portable, rugged and with an extremely high degree of power autonomy up to 24 hours with the power bank accessory, the VIU tablet is a reliable device in any environment.

## Leverage the same device for efficiency

The versatile VIU Tablet can be used for a variety of functions, making it a cost-effective option for election officials:

- Voter registration
- Digitizing official documents and signatures
- Voter check-in and verification
- Field operations monitoring
- Surveys
- Election results transmission
- Support requests

## The world leader in applied cybersecurity for elections

Since 2000, Smartmatic focused on designing and building cybersecure election technologies that are innovative and easy to use – for voters, poll workers and election officials – while protecting the integrity of the election process from start to finish.

Cybersecurity is our first and most important design consideration. Leveraging a solid election cybersecurity framework developed by Georgia Tech Research Institute, we apply a “defense-in-depth” concept that employs multiple layers of protection combined with a variety of safeguards and audit mechanisms. Adding simplicity to our focus ensures that security is not a tradeoff for usability or accessibility.

**Ergonomically designed. Robust. Multifunctional.**

Smartmatic is the world leader in applied cybersecurity and secure election technology—from voter registration, to vote tabulation, to results reporting and auditing. Since its incorporation in the US in 2000, Smartmatic auditable and cybersecure solutions have processed billions of votes in elections on five continents—all with zero security breaches.
