

Central Scanning & Tabulation

Providing Speed and Accuracy for Centralized Ballot Tabulation

Smartmatic provides jurisdictions with a Central Scanning solution powered by intuitive ballot-processing software to accurately tabulate large quantities of ballots quickly.

Compliant with VVSG 2.0

Smartmatic's Central Scanning solution will be one of the first certified to VVSG 2.0. As part of our voting system, it is designed to protect voting integrity and modernize your election processes.

Intuitive User Experience

The latest ballot-processing software guides users through their tasks, minimizing confusion, errors and the need for extensive training.

Efficient Processes

Our Central Scanning solution works in combination with our Election Management System where batch results are consolidated, ballot exceptions are reviewed, and results are published.

The World Leader in Applied Cybersecurity for Elections

Established in Florida in 2000, Smartmatic initially developed secure software for banking and IoT. After the "hanging chads" occurrence in the 2000 US election, the company shifted its focus to improving voting. Since then, election officials have used Smartmatic systems to record and tabulate more than 6.5 billion votes with zero security breaches.

From Los Angeles to The Philippines, from Utah to Belgium, and from London to Argentina, Smartmatic has successfully deployed secure election technologies in more than 30 countries.

Los Angeles 2020: The Largest Election Project in US History

LA County, the largest voting jurisdiction in the US, chose Smartmatic to manufacture, certify and deploy its publicly owned Voting Solutions for All People (VSAP) voting system. Smartmatic manufactured and programmed 31,000 ballot marking devices (BMDs) as well as developed all of the software including the back-end device management system.

We furthermore served, and continue to serve, as the system integrator and lead the California state certification on the system. Smartmatic also provided deployment and logistics for vote centers, and continues to be LA County's election deployment and Level 2 Help Desk partner.

Smartmatic is an approved US Department of Defense vendor and a founding member of the Department of Homeland Security Council for the Election Infrastructure Sector.

Accurately tabulate large quantities of ballots, whether the votes are mailed absentee ballots, hand-marked or BMD-marked ballots deposited into ballot boxes.
